Educational Furniture

With decades of manufacturing experience, at Intermetal we always aim at producing quality, safe and durable education furniture. No matter what you require, we have the capacity, experience and know how to deliver products you can trust.

Since 1989 Intermetal has been designing and manufacturing resilient furniture for all levels of education. As a leader in our field, customers have come to rely on us for their complete educational furniture requirements.

From inception, we recognized that quality, comfortable and adaptable furniture increases concentration and contributes to the student's health and development. As specialists in our field, we realize that "one size does not fit all" and offer a variety of products to suit varying heights, sizes and age groups.

With recent developments in technology, we continue to create innovative and flexible furniture solutions to accommodate multi-use spaces, individual learning styles and varying teaching methods.

Located in Dubai, UAE our factory is equipped with the latest technology and manufacturing processes to create furniture in aluminium, steel and wood, a combination of manufacturing capabilities that is rare to find with one company.

At Intermetal we supply furniture for Early Learning, Classroom, University, Breakout, Library, Cafeteria, Office, Auditorium and Reception. As a one-stop-shop, clients do not need to source out their school furniture from a range of suppliers, as we have it all under one roof. Aside from our standard product line, our in-house Design Team is on hand to assist with bespoke solutions to meet exact requirements and can provide room layouts to ensure the proper selection of furniture and utilization of space.

Intermetal is an ISO 9001:2015 and FSC™ Certified Company.

Our finished products speak for themselves and reflect our commitment to excellence.
